MARMO

The Marmo series is a masterful homage to the timeless grandeur of marble. Inspired by the unmatched elegance and intricate veins of this natural marvel, our artists embarked on an intensive journey, dedicating themselves to capturing every nuance of marble's essence.

With careful artistry and unrivaled precision, they recreated the intricate patterns and textures of this revered stone, striving to echo its very soul.

Each piece undergoes an exhaustive process, where no detail is overlooked, and every imperfection is meticulously removed, ensuring that the purity and strength of the material are enhanced to perfection.

The result is not just a series of tiles, but a breathtaking tribute to the art of marble itself brought to life through the visionary hands of our craftsmen.

TECHNOLOGY

SINTERED STONE

Undergoes intense high-temperature heating above 1200°C and is pressure bonded under 44,000 tons, resulting in a robust, naturally fused material, utilizing a unique sand clay formation and advanced Italian GEA PRESS technology, creates a highly durable surface.

DRY GRANULAR

Dry Granular technology employs a distinct glazing method to prevent light distortion resulting in HD mirror like reflection and durable finish.

What does it actually mean?

- **Granulating Glaze Material**
Grind the glaze material into fine granules using a grinder or mill machine.
- **Application of Dry Glaze**
Sprinkle or apply the dry glaze granules evenly onto the surface of the ceramic tiles using a controlled method such as spraying or dusting.
- **Pressing and Adhering**
Press the granules gently onto the surface of the tiles to ensure adhesion and uniform coverage.
- **Drying Stage**
Allow the glazed tiles to dry completely, ensuring that the granules adhere securely to the surface.
- **Firing Process**
Once dry, fire the tiles in a kiln or furnace at high temperatures to fuse the glaze granules onto the ceramic surface, creating a smooth surfaces.
