Icon Guide

VitrA Clean

Limescale is persistent in most bathrooms. VitrA Clean technology is a special double-glazing process that makes washbasins, WC pans, urinals and bidets water repellent. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.

Bidet Function

This innovative solution developed using a bidet nozzle, helps you clean hard-to-reach areas effortlessly.

Rim-Ex Technology

Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

VitrA Hygiene

VitrA Hygiene is a unique glazing process developed by VitrA to prevent germ proliferation in the moist bathroom environment. From washbasins to WC pans, bidets or urinals, sanitary ware produced with VitrA Hygiene technology offers superior hygiene to users throughout the products' lifetime.

VitrA Fresh

VitrA Fresh WC pan features an integral tank that dispenses detergent with every flush, helping to clean the pan thoroughly and protect against the build-up of bacteria.

VitrA Fresh prevents the need to add cleaning agents to the cistern, which can corrode the flushing mechanism. VitrA Fresh is currently available in the Metropole series.

Washbasin Forms

Washbasins can be used with a pedestal as well as being wall-hung. Basins suitable for use with a counter top can be fitted in three alternative ways:

COUNTERTOP

INSET

UNDERCOUNTER

The Essence Of Vitra

Vitra bathroom products are designed to combine beauty with practicality, offering the very best in comfort, storage and ease of maintenance.

Philosophy: It's all about inspiration

Vitra's quest is to create beautiful, inspiring bathroom environments, and to change the perception of the bathroom from that of a purely functional space into something much more, turning an essential, every day experience into something beautiful, relaxing and life-enriching.

Design Excellence Recognised

The superior design, quality and innovation behind Vitra's products has been acknowledged by some of the world's most prestigious design awards.

Design Excellence Recognized.

The superior design, quality and innovative features of Vitra products are acknowledged with some of the world's most prestigious awards.

Terri Pecora

Aesthetic functionality best describes Terri's work and she has often experimented with unexpected solutions which set her projects apart. She has also worked extensively as an Art Director for communication concepts and design strategies, guiding graphic designers, photographers, video makers and web designers throughout the creative process. Terri crafts a connection between the vast array of elements within a Brand's repertoire to create coherent, long lasting and exciting scenarios to build upon.

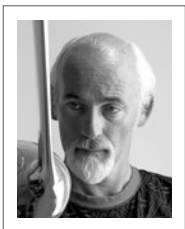

Claudio Bellini

Claudio Bellini lives and works in Milan, where he graduated in Architecture and Industrial design at the renowned Politecnico university in 1990. Today Claudio Bellini Design is recognised as one of the most influential European studios. For Equal, Claudio Bellini has re-imagined the modern bathroom through an architectural lens. The minimalist approach to the design is complemented by the monochrome hues and metallic finished that Bellini has selected.

Arik Levy

'Creation is an uncontrolled muscle,' says all-rounder Arik Levy. Artist, technician, photographer, designer, and video artist, Levy's work can be seen in prestigious galleries and museums across the world; he creates hi-tech clothing lines and accessories as he continues to contribute substantially to our interior and exterior milieux from his studio in Paris. Levy designed the Voyage Collection for Vitra.

Ross Lovegrove

One of the most fascinating designers of the 21st century and recipient of countless awards, Ross Lovegrove creates sculptural and organic shapes using sophisticated technology and materials. His design concept 'organic essentialism' is inspired by elements from the natural world which are then reshaped into futuristic forms, beautifully portrayed in the Istanbul range.

NOA

The German design studio NOA specialises in designing new products, technologies and communication strategies. NOA's fruitful collaboration with Vitra has created many ranges including Metropole and V-Care.

Pentagon Design

Pentagon Design is an award-winning design studio based in Finland. The popular Nest and Nest Trendy ranges are a perfect example of their commitment to meeting the needs of the consumer. The result is the development of product ideas and strategies that engage the user and the architectural space.

Christophe Pillet

Based in France, Christophe Pillet's name is synonymous with stylish, functional and natural design – the lightness of touch in his work is elegance epitomised. His perfect command of sensuality and refinement has made him one of the most renowned French designers to have gained global recognition. The Memoria range is one example of his commitment to creating beautiful, elegant bathroom products.

Matteo Thun & Partners

Milan-based Matteo Thun & Partners is a studio of architecture, design and communication that refuses to be categorised in stylistic terms. The Water Jewels range including the metallic finish basins bring a sense of dramatic and endless originality.

Sebastian Conran

With design in his blood, Sebastian has been designing stylish and innovative homeware for over 40 years. Based in his West London studio-workshop, he is intimately involved in all aspects of the design process; sharing his discerning eye, wealth of experience and manufacturing expertise in his collaboration with Vitra. The Eternity accessory range by Sebastian Conran incorporates the use of teak wood, chrome, copper, and soft gold finishes to create a range as beautiful in form as it is in function.

Design Studio Vitra

Led by Erdem Akan, the in-house team of designers represent the backbone of Vitra's design philosophy and culture. They are supported by the multi-disciplinary teams at the Vitra Innovation Centre. The hallmark of the Vitra collections are innovative designs based on sustainability, 'design for all' principles underpinned by sophisticated technology.

A History Of Ingenuity

VitrA's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in Izmir.

The business continued to grow steadily, and by 1952, he had opened Turkey's first modern pharmaceutical plant.

Three decades later, his son, Dr Nejat Eczacıbaşı took the family business a step further by establishing a pharmaceutical laboratory in Istanbul.

The business continued to grow steadily, and by 1952, he had opened Turkey's first modern pharmaceutical plant. Five decades after the renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products, Turkey's first ceramic sanitaryware plant was established.

Innovation And Creativity

VitrA's Innovation Centre – where all the magic happens, from the conception, development and realisation of original ideas and designs, to the innovation, planning and production of new technology and materials.

Here, architects and designers are encouraged to free their imaginations, and original ideas are showcased in a setting that blends culture, art and lifestyle. It's this commitment to innovation and creativity to constantly improve comfort, sustainability and bathroom aesthetics that is helping us transform the traditional concept of the bathroom.

Development

Vitrus

The Vitrus glass cistern and frame from Vitra stands out with its elegant design and offers an alternative solution for stylish bathrooms.

Easy to install with a large cover opening, allowing ease of maintenance. With two colour choices of black and white, the Vitrus glass cistern and frame is a unique solution to update your bathroom with either a wall-hung or back-to-wall WC, removing the need to create a false wall to hide the cistern. Vitrus is compatible with all Vitra wall-hung and back-to-wall WCs. Its double step function can be water saving. Its double-step function can save up to 70% of water consumption through 2.5 / 4 L and 3/6 L alternatives.

For more information on Vitrus, please see page - 103

Striking Finishes

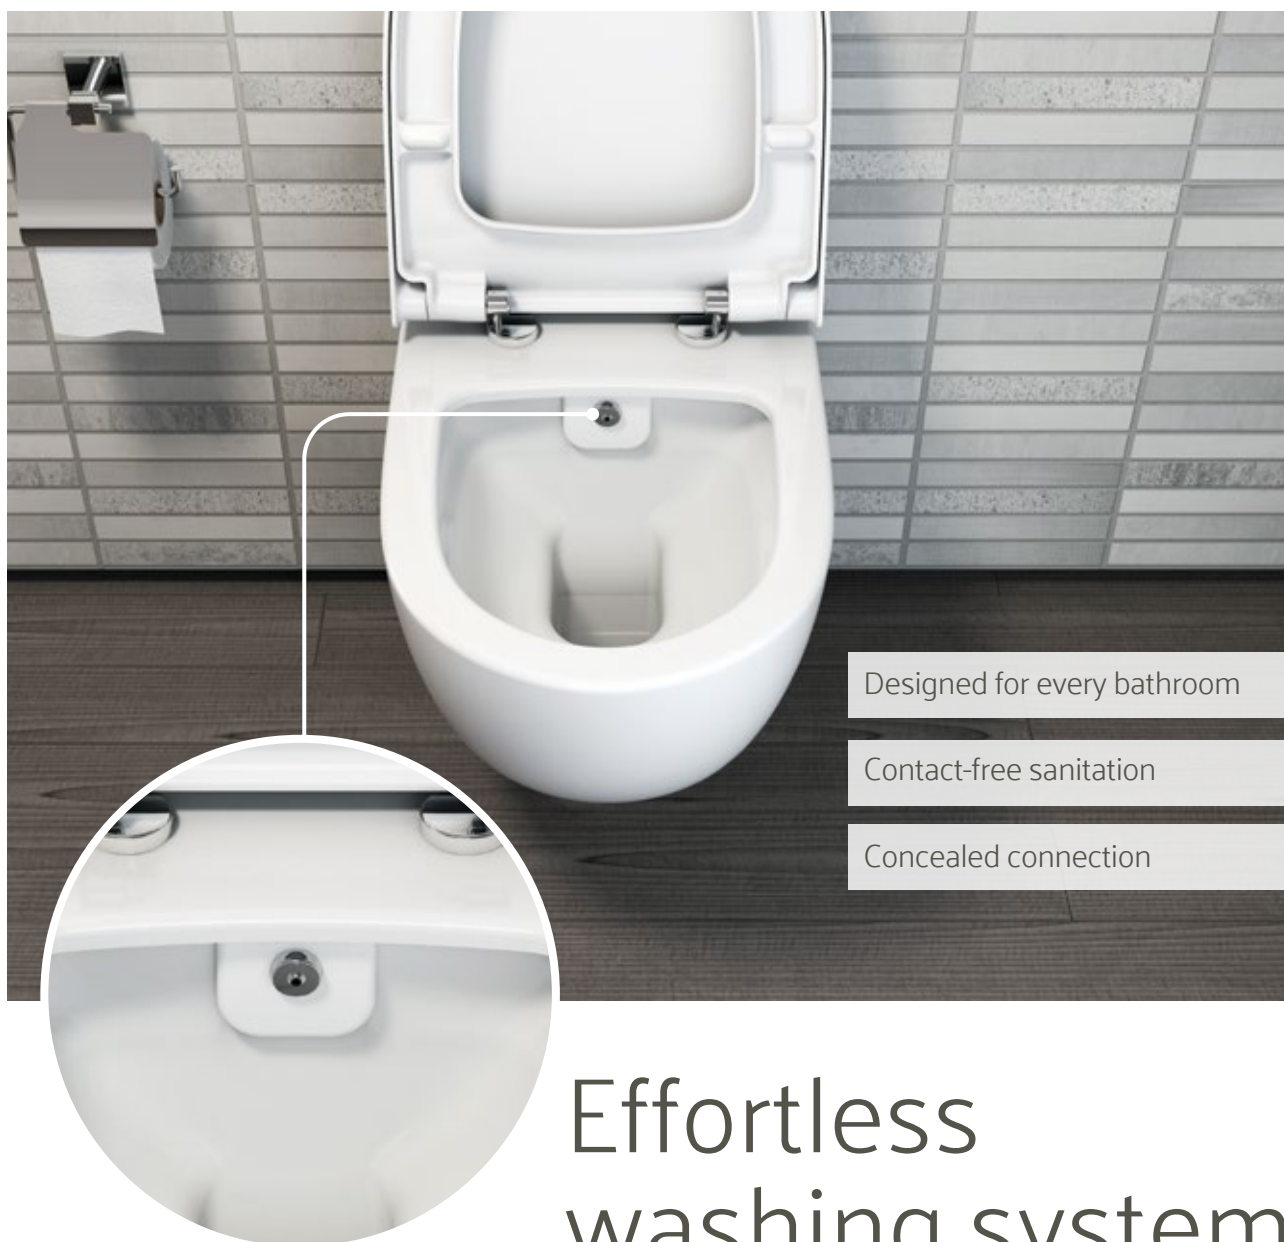

Water Jewels is a unique range of basins designed by Matteo Thun for Vitra.

Physical Vapour Deposition (PVD) is a state-of-the-art manufacturing process in which metal powders are vaporized and deposited onto a surface.

The metallic coating presents a striking visual and remains corrosion and scratch resistant. The range is available in gold, copper and platinum as well as the traditional white ceramic.

For more information on Water Jewels, please see page - 78

Designed for every bathroom

Contact-free sanitation

Concealed connection

Effortless washing system

Bidet function

Water is the most efficient way to clean any body part. This innovative solution, developed using a bidet nozzle, helps you clean hard-to-reach areas effortlessly. The need for hygiene gets even more important during times of health problems, women's menstrual cycles and at older ages. Not only are these Bidets functional but also almost invisible keeping your bathroom chic!

Personal Washing Systems

Designed For Every Bathroom

CONCEALED BIDET CONNECTION

- Concealed connection parts
- Wall embedded stop valve connection

Integrated Stop Valve Connection with Thermostatic Cartridge

- Thermostatic cartridge initially keeps the water temperature at 38° to prevent contact with hot water
- Stop valve connection is present on the WC

Integrated Stop Valve Connection with Standard Cartridge

- Can adjust water temperature between 20° - 60°
- Stop valve connection is present on the WC

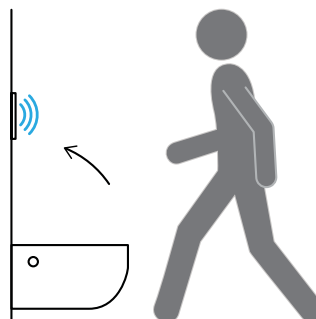

Touch- Free Experience

Approach

The Vitra Touch-free Toilet Lid lifts when the V-Care Smart Panel sensor has detected the user.

The WC is ready for use without the need to touch any surface.

Use

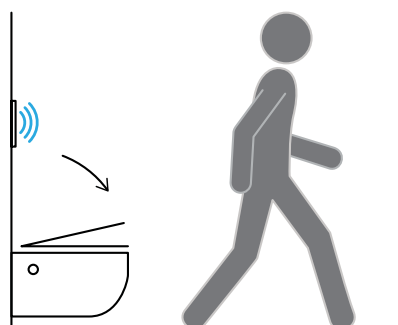

The Vitra Touch-free Bidet starts the wash when the sensor detects the user's hand, and stops on detecting the hand a second time.

This means there is no need to worry about who may have used the WC before you.

Flushing

The Vitra Touch-free WC Seat closes automatically when the user stands up and moves away, and the toilet flushes only after the lid is shut.

This prevents the risk of bioaerosol contamination via inhalation or contact with surfaces. It also guarantees a clean WC pan, ready for the next user.

Touch-Free Auto And Periodic Flush

An indispensable element in the Vitra smart bathroom products ecosystem, the V-Care Smart Panel undertakes a major role in creating a hygienic environment and protecting public health. With twenty-two patented technologies, the V-Care Smart Panel's auto flush feature prevents the need to touch the panel and reduces the risk of cross-contamination.

Even when a manual flush is required, there is no need to touch the panel; it is enough to bring the hand to 10 mm away from the panel. In case a second flush is necessary to clear the bowl, the V-Care Smart Panel waits until the cistern is completely full to ensure a more effective flush.

A period of inactivity could lead to bacterial proliferation, backflow through the waste pipes and even a build-up of minerals and other deposits. The periodic flush mode regularly washes the bowl to minimise the risk of dirt, stains, odours and bacterial growth, thereby greeting users with a hygienically clean toilet every time. The default setting is ON, but it can be turned OFF via the mobile app.

The mobile app offers additional benefits such as comfort, usage data display, remote control and updating. Thanks to the network connection, the V-Care Smart Panel firmware always remains up to date. The dashboard enables remote monitoring of all installed plates, statistics viewing, and function control for commercial enterprises and institutions.

Touch-Free Toilet Seat To Prevent The Spread Of Pathogens

Vitra's Touch-free Toilet Seat opens and closes the lid automatically to reduce the risk of pathogen crosscontamination.

Designed to be used with the V-Care Smart Panel, the lid lifts on detecting the user, preparing the WC pan without the need to touch.

The spread-free feature of the V-Care Smart Panel automatic mode closes the lid once the user has stood up and left before flushing in order to prevent the risk of bioaerosol contamination via inhalation or sticking to surfaces. It also guarantees a clean WC pan, ready for the next user. In the manual mode, the lid and flushing operations are determined by the user.

Manufactured from hygienic duroplast material, the Vitra Touch-free Toilet Seat prevents the growth of microorganisms on its surface. Sleek look and compact structure ensure uncompromising comfort and hygiene at the same time.

As the touch-free seat draws power from the control panel, no additional wiring is needed, a point which makes installation safe and easy. With an IP44 rating, it is protected from dust and water spray, thereby facilitating routine WC pan cleaning. The V-Care Smart Panel takes over in the case of a power cut to provide power for up to ten washes. A further safety measure is the lid motor which automatically shifts to idle in case of anything getting caught, thereby protecting both the user and the seat/lid.

Having passed the 200,000 cycles test, the Vitra Touch-free Seat offers problem-free operation even under the most intense usage conditions.

Touch-Free Bidet Function

Sento Rim-ex wall-hung
WC, 54 cm
7948

Controlled by a built-in sensor, Vitra Touch-free Bidet enhances personal hygiene in toilets and reduces the risk of pathogen cross-contamination.

Connected to the V-Care Smart Panel, the touch-free bidet is activated once the sensor in the control panel has detected the user in order to prevent accidental operation.

The touch-free bidet is illuminated by LED lights when the user enters the cabin, and starts a 30-second wash when the user's hand is detected. It offers a comfortable wash with the ideal water pressure (3 l/min) as determined by user tests. The flow stops automatically unless the user moves a hand to the touchfree bidet again. This limit also contributes to a water saving.

Since the touch-free bidet draws power from the control panel, no additional wiring is needed. The V-Care Smart Panel takes over in the case of a power cut to provide power for up to ten washes.

Having passed the 250,000 cycles test, the Vitra Touch-free Bidet offers problem-free operation even under the most intense usage conditions.

Touch-Free Flushing Technology

The control panel with Vitra Touch-free technology improves hygiene in public toilets. As there is no need to touch a flush button, the risk of pathogen cross-contamination is reduced.

Once the control panel with Vitra Touch-free technology has detected the user and monitored the amount of time spent in front of it, it flushes the bowl with the appropriate volume of water, thereby saving water. A button on the panel gives the option of mechanical operation in case of a power cut.

VitrA Hygiene

Ion-Rich Technology That Inhibits The Growth Of Harmful Bacteria

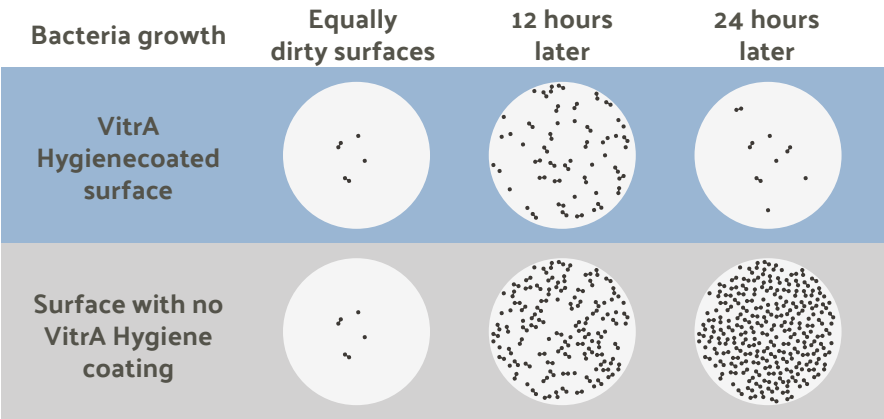

Vitra Hygiene, which coats all Vitra ceramicware, inhibits the growth of harmful bacteria by 99.9%. By disrupting the cellular structure of bacteria that cling to the surface during use, this proprietary glaze prevents them from proliferating into a colony.

Tests in accordance with the national and universal ISO 22196, JIS Z 2801, ASTM E 3031-15, and TSE 13420 protocols have verified the efficacy of Vitra Hygiene against gram negative (*Escherichia coli*) and gram positive (*Staphylococcus aureus*) strains.

The Vitra Hygiene glaze coats all external and internal surfaces prior to firing in a process that ensures lifetime Vitra Hygiene protection for Vitra ceramic sanitaryware even under the most intense usage conditions.

Fewer chemicals and better hygiene with Vitra Hygiene

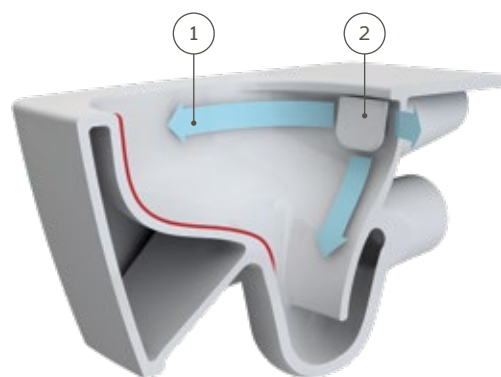

VitrA Rim-Ex

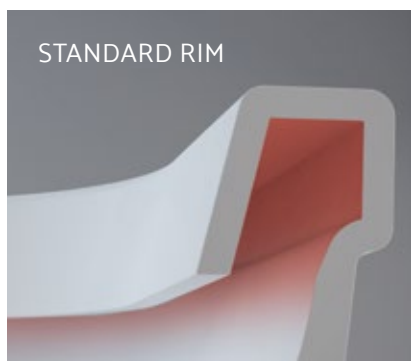

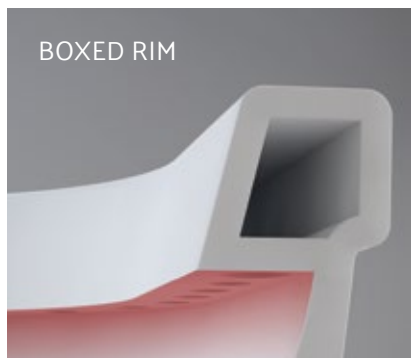

Free of the channels and openings that can harbour harmful dirt and micro-organisms, the VitrA Rim-ex rimless pan design makes these WC pans 95% more hygienic* than standard pans, and easier to clean. Its patented technology ensures a thorough and 25% more hygienic flush each time.

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The Redesigned Bowl Features
A Smooth, Channel-Free Design To
Discourage Germ Reproduction,
And Provides Superior Hygiene

- ① **Rimless Bowl**
 - Easy-to-clean with no rim or channel for germs to collect
 - Efficient flushing in specially designed bowl
- ② **Water Distribution Tool**
 - Specially engineered water diverter
 - Removable for easy cleaning
 - Flushes to 65mm from the top of the pan for added cleaning

VitrA Clean

Surface That Repels Dirt And Dirty Water

VitrA Clean has hydrophobic finish over the entire ceramic surface, which repels dirt and dirty water and simplifies cleaning without the need for aggressive agents. VitrA Clean causes water to form droplets that slide down the sloping ceramic surface. As they are

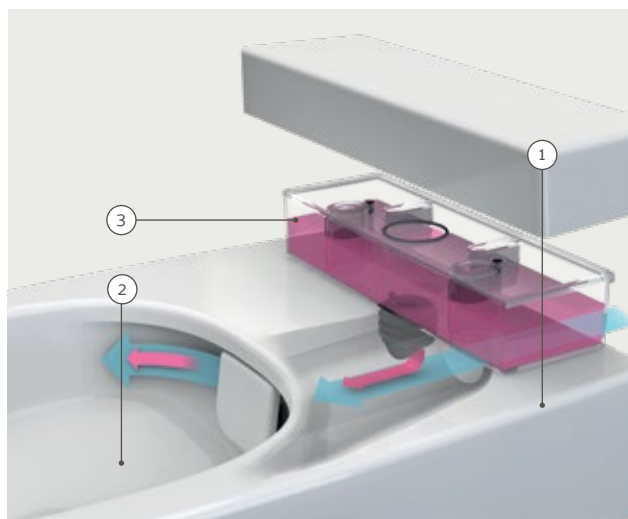

pulled down by gravity, these globules carry away any clinging dirt, thereby cleaning the surface.

Developed by the VitrA innovation team and constituting of long chains of molecules, VitrA Clean is suitable for all

ceramicware surfaces such as washbasins, WC bowls and bidets in any colour or specification. VitrA Clean's protection lasts for the lifetime of the ceramicware under even the most intense use conditions.

VitrA Fresh

Cleaning With Detergent In Every Flush

WC bowls and urinals equipped with a VitrA Fresh detergent dispenser clean and prevent limescale and odours with each flush.

VitrA Fresh dispenses a pre-determined amount of cleaning fluid into the water every time the flush button is pressed. The dispenser can be filled with non-bleach cleaners, limescale reducers or fresheners. It gives a hygienic wash and freshens with each flush. Installed independent of the cistern, the VitrA Fresh dispenser presents no risk to internal parts.

The patented dosage system adds 1 ml of cleaning fluid into the wash with no need for additional wiring or batteries. The dispenser has a maximum capacity of 800 flushes in a WC and 400 in a urinal.

Auto Flush After Every Use

In public urinals with VitrA Touch-free technology, the bowl is washed automatically, reducing the risk of pathogen cross-contamination.

Once the VitrA sensor has detected the user and monitored the amount of time spent before the urinal, it washes the bowl with the appropriate volume of water in order to contribute to water saving.

Touch-Free Hand Wash Technology

Controlled by a built-in sensor, the Vitra Touch-free Basin Mixer improves hygiene in public toilets and reduces the risk of pathogen cross-contamination.

The sensor detects the user and contributes to water saving by stopping the flow as soon as the user moves away from the detection area.

Double inlet Origin mixers allow management to set the ideal water temperature through a concealed adjustment system, thereby saving users from having to touch the controls to adjust water temperature. Thermostatic versions maintain temperature without the need for adjustment; in case of a cold water cut, the hot stream is also stopped to prevent scalding.

Powered by mains or batteries, these mixers are completely safe thanks to waterproof wiring conforming to IP 68 standards.

Soap Dispenser That Reduces The Risk Of Pathogen Cross-Contamination

Vitra's Touch-free Soap Dispenser improves hygiene in public toilets and reduces the risk of pathogen cross-contamination.

With built-in and countertop models, the dispensers are powered by mains or batteries and are perfectly safe thanks to waterproof wiring conforming to IP68 standards.

The one litre container offers 650 uses on average from one refill.

Auto Clean Washbasin With Touch-Free Control

Washbasins equipped with a Vitra Fresh detergent dispenser clean and prevent limescale and odours with each wash.

Vitra Fresh dispenses a set amount of cleaning fluid into the water running into the bowl every time the wash button is pressed or the sensor is activated. The dispenser can be filled with non-bleach cleaners,

limescale reducers or fresheners. By preventing the proliferation of pathogens, it reduces the risk of cross-contamination in public use areas.

A maximum of 5 to 10 ml of cleaning fluid from the Vitra Fresh dispenser is mixed into 1 litre of water to clean the washbasin. The concealed water outlet in the Vitra Fresh washbasins prevents the build-up of dirt and ensures maximum hygiene.

V-Care

A Smart Toilet Engineered As A Design Icon

Designed by Arik Levy in collaboration with the Design Studio Vitra and Innovation Center, the V-Care Smart Toilet Prime exemplifies the perfect integration of bathroom design and sophisticated technology, which pampers while it delivers the ultimate in personal hygiene.

V-Care Prime smart toilet, 62 cm
7231

V-Care Smart Toilet Prime Personal hygiene features

Every detail is designed for personal hygiene and well-being.

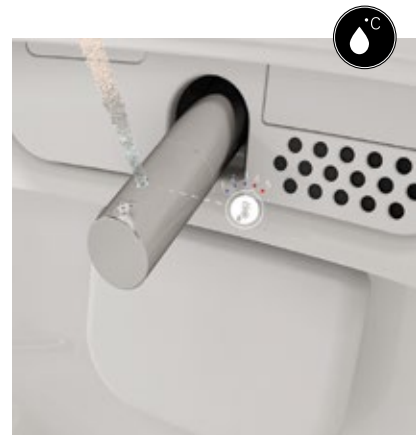

Front and rear wash

The nozzle produces a rear wash suitable for all, as well as a gentler front wash as a bidet for women.

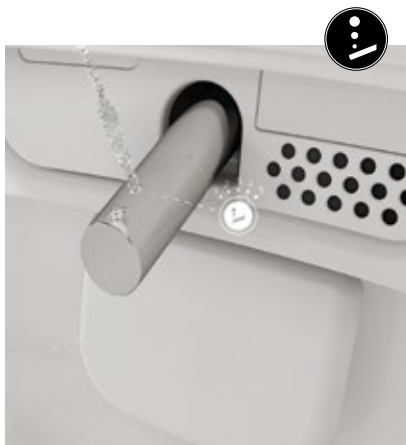

Adjustable nozzle position

Perfect cleansing by adjusting the nozzle back and forth.

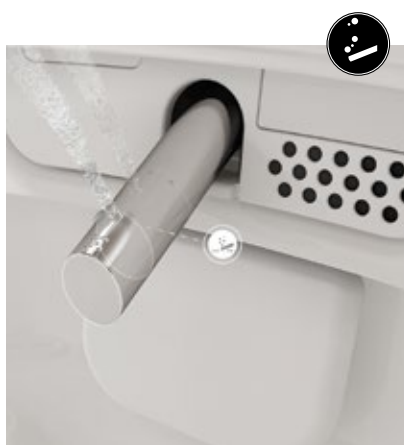

Adjustable water temperature

Five different water temperature settings offer a more comfortable cleansing ritual.

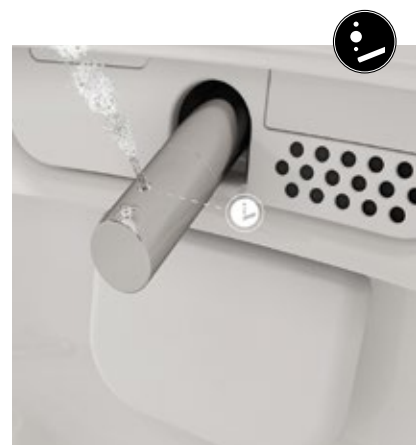

Adjustable water pressure

Five different levels of water pressure offer a thorough and pampering wash.

Oscillating wash

The bidet nozzle moves back and forth for a thorough clean over a larger area.

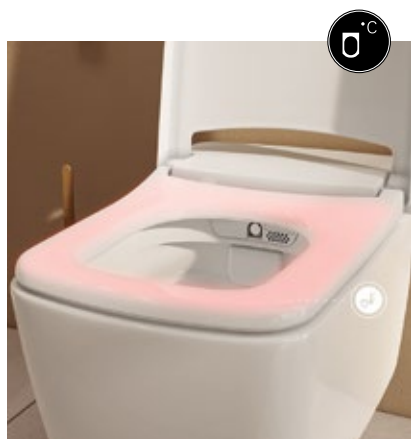

Massage wash

The water pressure alternates between gentle and firm for a massaging wash.

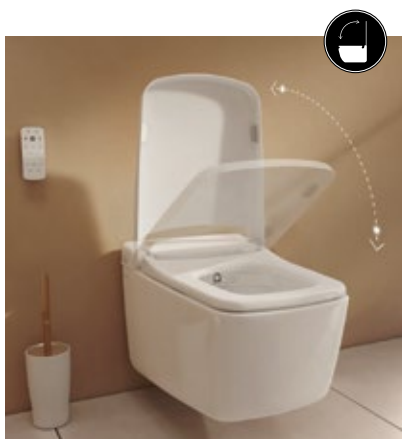

V-Care Smart Toilet Prime Comfort features

Every detail is designed for comfort.

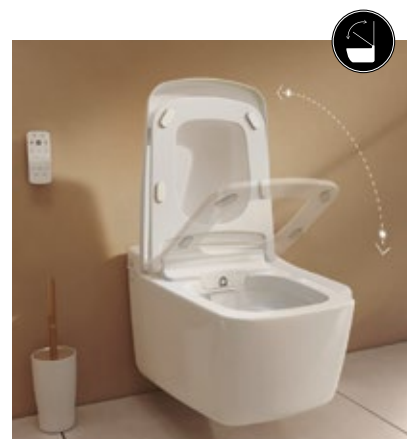

Adjustable seat temperature

The seat has a choice of five temperature settings to complete your comfort.

Auto open/close lid

The motion sensor automatically raises the lid on detecting your approach, eliminating the need to touch it.

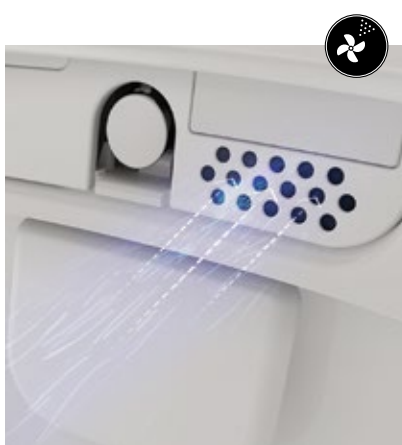

Open/close lid and seat

The lid and seat can also be opened and closed by remote control or mobile app, with no need to touch the seat.

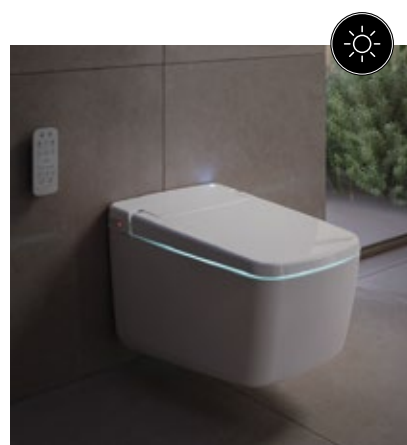

Dryer and adjustable air temperature

After washing, the warm-air dryer provides fast and gentle drying. Also, free yourself from toilet roll. Five different levels of air temperature settings offer more comfortable drying.

Air purification

Thanks to powerful deodoriser filters, the air is freshened around the toilet.

Night light

The LED night light is automatically activated when the ambient light levels fall.

Comfort at your fingertips

VitrA V-Care Smart Toilet Prime enhances your toilet experience with technology, including remote control and a mobile app. It provides full control of your hygiene with its touch-free use and keeps your personalised settings for V-Care in the app.

A Fully Customizable Hygiene Experience

Designed by Noa in collaboration with the Design Studio Vitra and Innovation Center, the V-care Smart Toilet Comfort variant offers you a user-friendly and fully customisable personal hygiene experience.

Features

We Care About The Personal Hygiene

Designed by Noa in collaboration with the Vitra Design and Innovation Team, V-Care Smart Toilet provides a user-friendly, fully customisable personal hygiene washing experience. V-Care Smart Toilet is easily controlled by the intuitively engineered remote control or the side control panel; providing easy access to the simple cleaning and drying functions.

Integrated Bidet Function To Maximize Personal Hygiene

The integrated bidet nozzle provides gender specific washing options, and the bidet nozzle cleans itself before and after each use.

Rimless Design

Vitra Rim-ex keeps the toilet 95% more hygienic according to a standard WC. It also makes the WC easy to clean.

Fighting Against Limescale

V-Care Smart Toilet Design fights against the limescale deposits with a special decalcification solution, providing protection from the damaging effects of limescale deposits.

Full details of our V-Care WC are available on request, or can be found at vitra-india.com

Form Designed To Blend And Integrate
Well In Virtually Any Bathroom
Environment

Blue Life

For our blue planet...

Blue Life Is The Production Approach, Design, Attitude And Management Outlook Of All Eczacıbaşı Building Products Division Brands Including Vitra

Blue Life

A Pledge To The Future

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Vitra believes managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

PRODUCT CERTIFICATES

Production Certificates

ISO 9001 Quality Certification / ISO 14001 Environmental Certificate / ISO 50001 Energy Management System Certificate / OHSAS 18001 Occupational Health and Safety Management System Certificate

The Manufacturing Plants Are Equipped With Specifically Designed Recycling Systems To Reduce Raw Material And Power Consumption

Under the guidance of effective waste treatment methods implemented by the Eczacıbaşı Building Products Division, in 2017, optimal purifying technologies were developed to recover water. Today Vitra, part of the Building Products Division, consumes 35% less water of production output.

Temperatures of the ceramic kilns were also readjusted in the Vitra plant, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use. So you know choosing a Vitra product means you are contributing to saving the world's natural resources.

For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute, and reduces water use by up to 60% compared to the single flush.

With Vitra's brassware equipped with an adjusting pin, special ceramic cartridges can be set to limit the amount of water released creating savings of up to 60%.

Finally, thermostatic bathtubs and shower mixers save water and power by eliminating the need to adjust hot and cold water until the desired temperature is achieved, ensuring reliable water flow temperatures.

Your Contribution To Saving Water

Vitra's products are developed and designed in line with our Blue Life philosophy, and reflect our commitment to preserving and recycling natural resources.

European Water Label

Vitra are committed to supporting the European water label.

Voyage NEW

Ceramics available in

White

Arik
Levy

Designed by Arik Levy in collaboration with Design Studio Vitra. Voyage is a system offering new possibilities for a peaceful mind. Motivated by the premise that time spent in the bathroom is not just a physical experience, but rather is an interval, Voyage creates a space where the mind and body meet, where the emotional and spiritual aspects of an individual's existence are stimulated.

Vitra Design Team

Vitra's team of in-house designers represent the backbone of our design philosophy and culture. These emerging stars are supported by multidisciplinary teams at the Vitra Innovation Centre. The hallmarks of Vitra's collections are innovative design based on sustainability, 'design for all' principles and superior concepts underpinned by sophisticated technology.

Bringing a fresh new look to basin design, the Outline range made from cerafine ceramic with the Vitra Clean glaze offers a choice of shapes and finishes. Unique to Outline, Vitra introduces the new pebble shape to this range of countertop basins. The four additional shapes available are TV, oval, square, and round.

Claudio
Bellini

Designed by Claudio Bellini in collaboration with the Vitra design team, Equal truly offers a bathroom with character.

The contemporary collection infuses the washroom with tranquility through its use of pure shapes and seamless joints. Equal maintains the illusion of fluidity – using the smooth edges to mimic the natural cavities found in lakes, alongside more structured lines to ground the aesthetic. Exploring the synthesis between man-made structures and natural shapes creates the perfect harmony throughout the collection.

The Frame furniture range offers a distinctive new style to bathroom furniture blending natural matte finishes with wooden louvred drawers to create a beautiful statement bathroom. The furniture is available in three different colour combinations and comes with either a white or taupe vanity basin with soft curved edges. LED lighting in the drawers provides practical lighting in the bathroom. The Frame range also includes a selection of stand alone, inset and countertop basins available in four different shapes and five finishes, offering flexibility and choice.

Matteo
Thun &
Partners

A world-renowned, Milan-based studio, headed by the multi-award-winning Matteo Thun, famous as much for outstanding architecture as innovative design.

It's his talent for visualisation of form and space, alongside a deep understanding of the latest materials and technologies available that makes Matteo Thun's bathroom design so original.

The Water Jewels collection offers something truly extra special to those with a taste for the exotic. Matteo Thun's pure forms balance the curved and the linear with an added dimension, thanks to Vitra's own innovative, advanced manufacturing technology. The result is a range that balances space, form and function to quite stunning effect.

Concealed Cisterns & Control Panels

Specific design features	102
Vitrus glass cisterns	103
Control panels	104
Smart panel	106
Origin	108

VitrA's concealed cisterns are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place. VitrA's concealed cisterns, available in standard and short height, allow your bathroom designer the freedom to create a stunning room without the need for expensive structural building work.

Specific Design Features

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, and enables easy replacement of parts.

1 CONTROL PANELS

The control panel operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in VitrA labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New VitrA filling systems ensure fast and silent filling.

4 OVERFLOW PIPE

When too much water enters the cistern, the overflow pipe in the flushing mechanism channels the excess water into the WC pan, preventing the risk of flooding.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

7 BODY STYROFOAM

The styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.

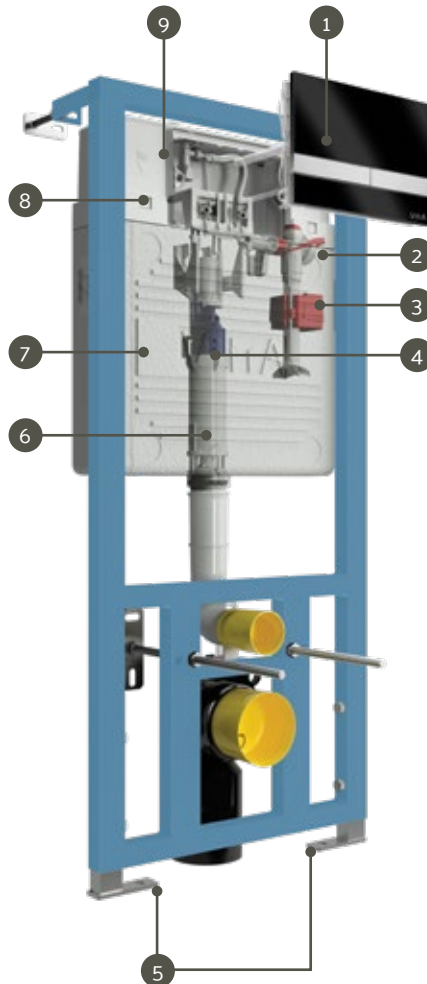

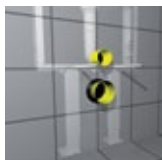

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 watertightness and accelerated life tests at the factory.

5 METAL STAND

Metal feet enable the easy adjustment of height from the floor and provide fixing points.

Control Panels

Control Panels

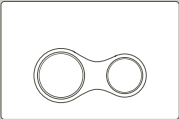

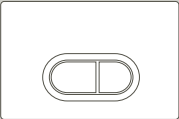

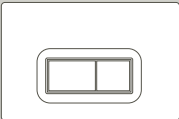

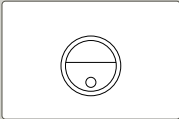

With a Vitra concealed cistern, only the control panel is visible; two buttons that release either a large or small quantity of water.

Vitra offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you've always wanted.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required, Vitra has a control panel and concealed cistern to suit.

Most Vitra control panel designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean, and protects against bacteria.

Control Panels

Mechanical	Electronic
 SIRIUS	 LOOP T - SENSOR & MANUAL
 LOOP O	
 LOOP R	
 LOOP T	
 SELECT	
 ORIGIN	 PRO - SENSOR & MANUAL
	 SMART PANEL

Electronic control panels must be used in conjunction with either 300-1028 (mains) or 300-1029 (battery operated). Electronic mechanism installation set must be installed during wall application. Not compatible with short cisterns.

Finishes

Gloss White	Chrome Plated	Matte Chrome Plated	Anti-fingerprint	Stainless Steel	Glass Taupe
Matte Black	Gold	Glass White	Glass Black	Glass Gold	Glass Mink

Smart Panel

We care about you, your business and the environment.

Compatible with all Vitra concealed cisterns, V-Care Smart Panel is an easy-clean, durable glass panel, with high gloss black colour. Equipped with smart sensors, functions and specialized algorithms, V-Care Smart Panel cares about you, your business and also the environment. By using Vitra Mobile App it is easy to control and track the product remotely, explore the features for individual usage, and monitor a WC. It is also possible to monitor all WC usages of a whole enterprise centrally for businesses.

Auto Flush

With integrated sensors of V-Care Smart Panel, Auto Flush feature provides touchless control option and supplies the optimum amount of water for flushing considering the usage time.

Periodic Flush

When a WC pan is not used for a while, harmful bacteria can be carried from the waste pipes or they can reproduce inside the bowl. In order to avoid dirt, stain, odours and bacteria reproduction, V-Care Smart Panel periodically flushes itself in Periodic Flush Mode and welcomes users back with a clean and hygienic toilet. Thanks to the connectivity feature, V-Care Smart Panel calculates the optimum amount of water for flushing according to the weather conditions and humidity. This feature is ON by default, but it can be turned OFF manually by using Vitra Mobile App.

Lock

The Lock feature allows the user to deactivate the panel, when it is required for maintenance or security reasons.

Remote Access

Mobile App

The mobile app offers additional benefits such as ease of use, comfort and increased hygiene in the toilet. The application is available for both Android and iOS devices. By using Vitra Mobile App, it is easy to explore the features for an individual usage even from afar. Exceeding the standard usage of the flush, V-Care Smart Panel Mobile App widens the limits of time and place with extended control features. Pairing and communication is secured between the panel and the mobile app, which prevents misuse.

Dashboard

By using the web based admin dashboards for business enterprises, it is possible to access all installed products, to control the functions remotely and to monitor them in detail. It also gathers statistical data of usage to manage your enterprise in a more efficient way.

Origin

Minimalist Design

Origin control panel provides colour harmony with ceramic products in bathroom such as WC pan and washbasin with its black, white, taupe and mink colour alternatives. It brings a new breath for bathrooms with its glass material.

Thanks to its mechanic operating mechanism and two different buttons, it provides water-saving by presenting water usage options in small and large volume.

VitrA blends graceful curves with elegant angles to create faucets that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature controls require only the lightest of touches, whether it is for a basin, bathtub or shower system.

Every consideration is given to conserving water and energy without compromising the user experience.

VitrA faucets are incredibly easy to install. The main body of our taps and mixers are made of brass construction, ensuring solid durability, further underpinned by the reassurance of a 10-year guarantee.

Add the perfect finishing touch to your bathroom with our faucets, designed to complement any bathroom suite.

Origin

Designed by Vitra Design Studio

Silent Gracefulness

Origin portrays a delicate minimalism. The collection differentiates from the ordinary with its simple slenderness: Precise edges, fine details, and noble colours. By challenging the existing perception of faucets and accessories, Origin offers an integrated and charming final touch to the bathroom.

Bathtubs

Water Jewels	164
Istanbul	165
Neon	166

Bathing has always been associated with health, well-being and relaxation. Vitra's beautiful range of bathtubs continues to evoke, uphold and enhance these associations. Whatever your preference, be it free-standing or fitted, sweeping line or a calming curve, acrylic or mineral cast, our bathtubs make bathing a sensory pleasure. Our stylish range of free-standing bathtubs will not only relax the body and revitalize the spirit, but also transform your bathroom space to stunning effect.

Vitra bathtubs, made from high-grade acrylic, produce a superb finish. Each fitted bathtub features a minimum of five feet adjustable, a fully-encapsulated wooden baseboard and frame, and an advanced wall fixing kit to keep the bath tightly in place, ensuring stability with no creaking or bowing.

Vitra bathtubs & panels come with a 10-year guarantee.
