Advantages That Make It Unique

SOLID+ is a range of mass coloured technical homogeneous tiles with flecks that deliver outstanding performance. Made with cutting-edge ceramic materials, these tiles offer exceptional resistance to wear and tear, ensuring long-lasting durability and unchanged appearance over time.

Their superior physical, mechanical, and chemical properties come from advanced shaping technology that increases the density of the tile body, making SOLID+ the ideal choice for all types of projects.

Mass coloured

Create according to tradition

The result is a collection of products that combine aesthetic excellence, quality, and reliability. Through technological innovation, carefully selected raw materials, intensive research and development, and extensive company know-how, we ensure continuous growth of our product range. Every day, we are committed to delivering our very best.

Accuracy

Raw materials are carefully selected according to the strictest quality standards.

Technology

Unique graphics are created through the controlled mixing and deposition of powders.

Design

Aesthetic effects are integrated throughout the entire tile, without the use of paint or glaze.

Technical Quality

Ceramic solutions designed for exceptional resistance and durability.

Surfaces with
Size **600x600mm** &
600x1200mm

A Complete Solution

Wall and floor tile solutions for indoor and outdoor environments, either residential or public. Particularly suitable for high-traffic areas.
